

DATASHEET:

HA-PL5 CHARGER STATION-18

STORAGE AND CHARGING CASE FOR 18 HA-PL5 PORTABLE LIGHTS

The HA-PL5 Charger Station-18 is a durable and protective case designed for transporting and recharging 18 HA-PL5 portable lights. To use, simply place the lights into the charging bays. The intelligent charger starts immediately, and indicator LEDs on the portable lights provide real-time updates on their battery status, keeping you informed of their condition. Within 12 hours, the batteries are fully charged and maintained in optimal condition. There's no need to disconnect the charger from the grid once charging is complete.
